Jacob Illum
Chief Scientist at
Chainalysis Inc.

December 10, 2019, Jacob
managed Michel directly

I've had the pleasure of working with Michel for about 2 years, where for most of it I was his direct manager. Michel is an exceptionally talented engineer that comes with my highest regards and I would welcome any opportunity to work with Michel in the future. Michel stands out by consitently picking smart and performant yet maintainable solutions to problems and is able to do this in short order. Furthermore, Michel does not hesitate investigating and suggesting new technologies to solve existing problems and readily and independently prototypes such solutions. Michel will be a huge asset on any development team. **See less**

Shilpa Deshpande
Research Data Scientist at
Chainalysis Inc.

November 25, 2019, Michel
worked with Shilpa in the same
group

If you're looking for a ninja java/spring developer - That's Michel. If you're looking for an engineer whose code just works - That's Michel.
If you're looking for an engineer who loves learning new paradigms, technologies and excels at using it - That's Michel. If you're looking for an engineer who works really brings laughter to the room - That's Michel.
If you're looking for a friend in your team - That's Michel too.

I think I got really lucky when I got a chance to work with Michel. He is a standard of perfection. If I were you, I will find room in the team and just hire Michel :) **See less**
